

# Size guides and advice for customers

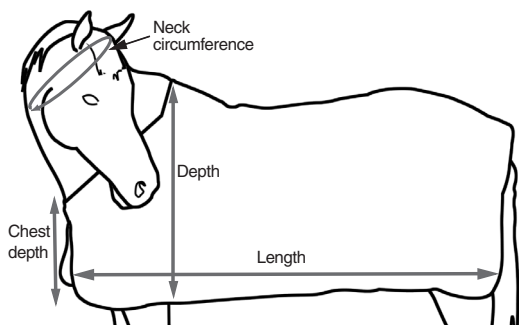

## RUGS

### How to measure for a rug

If you do not have an existing rug to measure, check which size to order by measuring the horse. The measurement should be taken from the centre of the chest where the front of the rug would be, around the shoulder and on a continuous straight line to the point level with the top of the tail.

This is much more reliable than merely depending on the height of the horse.

**Depth:** Where a Depth is stated for a rug, this measurement is taken from the wither to the hem of the rug. **Chest Depth:** Where a Chest Depth is stated, the measurement has been taken at the front of the rug (just above the buckles to the bottom hem).

**Neck Circumference** is only given for Full Neck rugs: the measurement is for the circumference of the narrowest part of the neck cover (nearest to the ears).

## JODHPURS

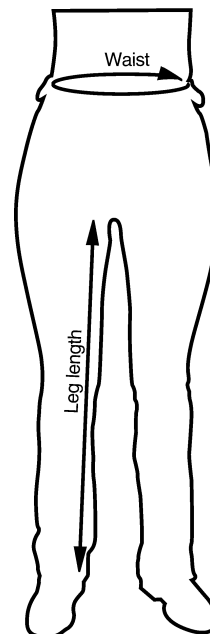

Carefully take your inside leg and waist measurements. Remember that different styles of jodhpurs have slightly different proportions.

Please note that when your jodhpurs arrive, they may appear shorter than the size ordered. This is perfectly normal as jods are made from stretch material. **Please try on your jodhpurs to ensure their fit is correct.**

### Jodhpurs and trousers

Waist measurement is taken all the way round the waistband of the garment, if it is an elasticated waist, this measurement is unstretched so allow 5 to 7.5cm of stretch on each measurement.

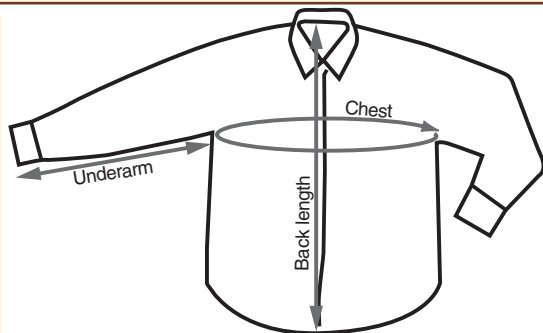

Inside Leg measurement is from the top of the inside leg on the trousers to the bottom hem.

## CLOTHING

We stock a wide range of clothing from a variety of suppliers and therefore the sizes differ slightly from product to product. The guides below are to help you identify your size requirement. If you are in any doubt or require further information about a particular product, please contact the Call Centre for further advice.

**Jackets and tops:** Chest measurement is taken all the way round the garment immediately under the arms. Underarm measurement is from the hem on the underside of the sleeve to the top of the arm. Back Length is taken from the bottom of the collar to the hem.

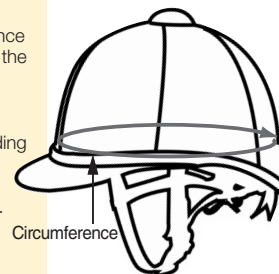

## RIDING HATS AND SKULLS

Measure the circumference of your head just above the ears. For accuracy, we advise you measure in centimetres, not inches.

For conversion to the riding hat or jockey skull sizes, please refer to the size guide panel on page 69.

### Circumference:

Circumference is the measurement of the headband of any hat

### CASUAL FLEECEES & OUTDOOR JACKETS

Size	Ladies Sizes	Gents or Chest Sizes
Xsml	8/10	32/34"
Small	10/12	36/38"
Medium	12/14	38/40"
Large	14/16	42/44"
Xlg	16/18	46/48"

### T-SHIRTS, SWEATSHIRTS & CASUAL CLOTHING

Size	Ladies Sizes	Gents or Chest Sizes
Small	8/10	32/34"
Medium	10/12	36/38"
Large	12/14	38/40"
Xlg	14/16	42/44"

## SADDLES

### Seat size

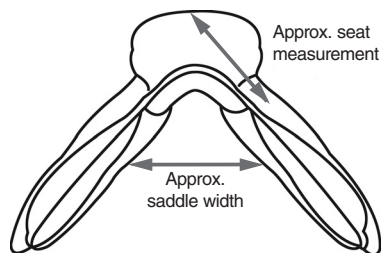

Carefully measure from the midpoint at the front of the saddle in a diagonal line to the cantle.

### APPROX. GUIDE

12.2-13.2hh	14" to 15"
13.2-15hh	15" to 16"
over 15hh	16½" or 17"

### Width fitting

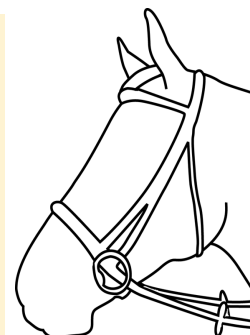

Measure just below the cut back head just above the padding for the knee rolls. If you do not have an existing saddle, take a wire coat hanger and mould it to the horse's withers, then draw around it on a piece of paper and cut out.

## BRIDLES

As a guideline to bridle sizes, we suggest you use the size of a bridle you currently use and are satisfied provides a good fit. If this is not possible, use the following general guide:

Pony Size:	11.2 - 14hh
Cob Size:	14 - 15hh
Full Size	15.2 - 17hh

## Size Conversion Guide

Use the ruler guides below to assist you in the conversion from inches to centimetres and vice versa.
